I consistently approach things from a unique perspective to unveil their hidden facets, crafting fresh narratives in my artistic endeavors. Opting for the digital medium aligns with my passion for being part of an innovative team shaping and enhancing the digital world. This medium gives me the versatility to balance artistic and realistic elements, enabling me to create both creative works and beneficial products. After working as a visual designer at Grab and Tiki Corporation, I pursued further education to fortify my expertise in the digital media field. My goal is to actively align myself with the evolving landscape of technology in the future and influence its direction.

Experience

Nozomi Networks

SharePoint Web Design Contractor (4/2023 - present)

- Designed SharePoint sites for the company homepage and People and Culture Department that align with brand guidelines and are easy to navigate and maintain.
