I often look at things from a different perspective to discover their hidden sides to depict fresh stories in my works. I choose digital medium as my practice, with a BFA degree in Digital Media Art from San Jose State University, because it is exciting to be a part of a creative crew who is building and improving the digital world. Digital medium gives me the ability to balance between artistic and realistic characteristics and allows me to create works to entertain people or create products that can benefit them. After working as a graphic designer at Grab, Southeast Asia's leading superapp for multiple services, and Tiki Corporation, a pioneer B2C e-commerce company in Vietnam, I went back to school to strengthen my knowledge and skills in the digital media field. I aspire to involve myself within the future paradigm of technology.

Experience

Nozomi Networks

SharePoint Web Design Contractor (4/2023 - present)

- Create graphic assets, redesign, and build SharePoint websites for the company and HR team.
